It is a very good plan to whitewash in the tool is a first place of the tools required are a fine saw, a sharp floor be spread over with fine gravel and the inside of the house kept clean and well ventilated. It is a very good plan to whitewash is a tool of the house kept clean and well ventilated. It is a very good plan to whitewash is a very good plan to whitewash in the first place. It is a very good plan to whitewash in the firs lifficult to force their way up through much during the summer's day;"

ter all, there is a great deal of very ineffective work done where the a great deal better. We see the fully shaped and clumsy ploughs every body knows that good ploughs had. Many of the ploughs in use had. Many of the ploughs in deepen the heavy for the work they are expected to heavy for the work they are expected to heavy for the work they are expected to heavy plough not only increases. And the time the full to force their way up through much depth of earth, after it is packed down by rains. A quarter, or half an inch at most, is quite sufficient for these seeds.

Care should be taken that no lumps of earth be left over them. We like long rows the every body knows that good ploughs had. Many of the ploughs in use heavy for the work they are expected to heavy for the work they are expected to heavy plough not only increases. A heavy plough not only increases.

A heavy plough not only increases and the first seed was a peck of very smutty wheat, one-half of which it was bought and the other washed in three waters and of or vanishing all impurities and keeping the was sown in the atter in which it was bought and the other washed in three waters and for vanishing all impurities and keeping the was sown in the atter in which it was bought and the other washed in three waters and for vanishing all impurities and keeping the bear an egg and then limed. Two-thirds of the what grown from the unwashed seed was a peck of very smutty wheat, one-half of which it was bought and the other washed in three waters and for vanishing all impurities and keeping the bark, and inserting the scion, but the walls and sprinkle the roosts and nests with some disinfectant; carbolic powder I think the best for keeping off vermin and for vanishing all impurities and keeping the boars, and inserting the scion, but the walls and sprinkle the roosts and nests with some disinfectant; carbolic powder I think the best for keeping off vermin and for vanishing all impuritie be heavy for the work they are expected. A heavy plough not only increases raight of a light team, but the work of all that the implement is capable of, as ight with a lighter plough.

In grading plough, well adapted to the work, to to hold easy and require but little extens to keep it in its place. It ought to hold easy and require but little extens to keep it in its place. It ought to hold easy and transplacement is placed to that the draft will be as light the manner of the work and the labor for the same number of plants in the garden.

Was smutty, while that grown from the steeped and limed seed had not a single ear of smut. Then some very fine wheat was taken perfectly free from smut. A quart of little extens the main feature in the art, for when the same into the same number of plants in the same number of plants in the garden. On the field the too frequent turnings consume much time in ploughing, and to some extent this is so in the garden.

In grading outside of the kernel contains a certain amount of lime, of which the shell is composed. I also keep before them a good supply of scraps and green food, onions and the labor for the same number of plants in the same for the same number of plants in the garden. On the field the too frequent turnings consume much time in ploughing, and to some extent this is so in the garden.

This is the main feature in the art, for when a mount of lime, of which the shell is composed. I also keep before them a good supply of scraps and green food, onions and the labor for the same number of plants in the same may run from one to the other. This is the main feature in the art, for when the same smouth of lime, of which the shell is composed. I also keep before them a good supply of scraps and green food, onions and the labor for the same number of plants in the garden. On the farm and in the garden. On the field the too frequent turnings consume much time in ploughing, and to some extent this is so in the garden.

This to the their them check they are supplied and properly

Dr. H. P. Wakefield, Superintendent

farm property. The lecture appears in fall high and in good repair, consisting of rails ollows:

I have a herd of forty cows. Our year ommences with the first of October.—that Board just submitted to the Legislature. Mr. Fay said:

For the purposes of this examination, I shall be deemed legal and sufficient fences. The statutes also provide season an instrument which conveys to him deed and seventeen quarts to the cow. The majority of them are grade Ayrahires, but I have some natives, and I have a few Shorthorn grades. I have two or three Jersey grades, which are very good cows. I do not expect to get much better ones. The lowest yield has been seventeen hundred quarts, and why that cow did not give more this year, I do not know. I have not turned her for the butcher, because I was in hopes there when my cow fell down in that region, they had better go to the butchers than stay for milkers. I do not suppose that I have got any such herd as the gentleman who apoke to us last night. All I judge from is the amount of milk they give. In regard to the butter, all I can say is that the cream makes pretty decent butter, as those gentlemen present who have ever been there can testify, because they have never eaten anything that was bought for them. If we had any good butter there we made it. Now. I rocommences with the first of October,—that a the time when we make our annual report to the legislature,—and these cows gave me ast year twenty-eight thousand and odd shall assume that one yed by an absolute deed were not to let them lie in common. In the event that was bought for them. If we had any good butter there we made it. Now, I propose to get from those cows, by this bull that I bought, the best stock I can, and whenever I find that anybody else has a cow whenever I find that anybody else has a cow which is superior to mine, I mean to get her, if her price is within my means. That is the way, in my ignorance, I have been open the same time by known and visible monuments, the latter will govern, unless it clearly appears that such monuments were inad-

TRANSPORTING BUTTER TO HOT

CLIMATES.

For many years butter has been sent from Expenhagen to Europein hermetically sealed in cans. Although the business was commenced originally as an experiment, it has menced originally as an experiment, it has the result. That has been my experience.

are less liable to mistakes; if then it appears is injured in his land by beasts of any description belonging to another, which escape upon his land from a highway aljoining, either because there was no fence or because the fence was insufficient, he may recover his damage in an action of tort against the owner of said beasts. If they escape over a "division fence" we rich was insufficient and that insufficiency was caused by the neglect of the person who claims to have been inced originally as an experiment, it has unded to such a degree that, during the laid down in the deed.

And where the quantity of land is menobject of packing the butter in this manner
is to protect it against the action of air
and heat, and this is so completely attained
that butter has been sent from Copenhagen
that the land contains that quantity, the
whole will be considered as mere description, and the quantity will yield to the location by certain boundaries. Martha's Vineyard—Constant Norton, of Ed-artown, President: William J. Ratch, of Wes

ORCHARD PLANTING

NUMBER IV. BY J. S. NEEDHAM. For the past thirty years new varieties of ears have been constantly coming before

the public, for their acceptance as worthy of are worthless for the farmer. In my descriptions of the individual characteriatics of the several varieties of pears, I shall go on hard pan, condemn all that

have proved worthless under my culture, or

I shall use no order in taking up the va ieties, but mention them as they occur to my mind. The variety in the yearly habits hinder

man from giving a list of sure varieties for ultivation, but then those changing habits may guide somewhat in the matter. The Bartlett originated in the Isle of Jersey, one hundred and thirteen years ago this spring. The wood is very feeble and

often gets winter killed. May not its tenlerness have been produced by being worked over? No doubt there is hardly a tree now living, but is eight or ten grafted generations from the original tree. It is an acknowledged fact in the minds of many pomologists, that frequent propagation by grafting of a variety weakens the

vitality of wood. Yet after all these draw-

backs the Bartlett stands high as a summer pear, and it well deserves its reputationdilicious and juicy, and withal large and The Bloodgood is a high flavored variety, riginating on the red soil of Flushing, on which it is of the first quality, yet on other soils it is very good. It is a native; about fifty-two years since it sprang from the seed. Dearborn's Seedling originated in Dor-

mon fruit. High top manuring improves it The Beurre d'Anjou is one of our best market pears; with proper management it keeps its beauty and ripeness without decay many weeks. It is one of the most popular

pears cultivated; it is about forty-two years

Trask at 7c iff fb live weight.
Hathaway & Swift sold 17 to Fogg average
1184 fbs at 6\(\)e three weight; 19 to Abbott average
weight 1173 fbs at 7\(\)e; 23 to Weitz average
1230 fbs at 6e five; 21 to Hall average weight 1230 fbs
at 6\(\)e the fill live weight; 31 to Gorning average
1172 fbs at \$5,55 per hundred live weight.
D. Thompson sold sold 13 to Wild average
weight 1282 fbs, 12 to Sanderson average weight
1362 fbs; 14 to Brooks average weight 1347 fbs
at 7\(\)e five.

Wales & Heath sold 20 to Sanders & Co average weight 1413 at 7½c live; 11 to Davis at 6½c live, average weight 1429 hs at 7½c live weight; 7 to Holms average 1135 lbs at 6½c live; 59 to Sanders & Co. at a countinsision.

J. McFlynn sold 13 to Wilkins average weight 1567 lbs at 6½c lft b live weight.

Farreli & Eannes sold 10 to Huse average 1302 lbs at 7c live weight.

WORKING OXEN.

There were not so many pairs of working oxen in market this week as there has been for several weeks nost the appear of the appear of the several weeks nost the seven live. es & Henth sold 20 to Sanders & Co aver-

WORKING OXEN.

There were not so many pairs of working oxen in market this week as there has been for several weeks past, the supply from Maine was small, the trade for workers has been very fair. J. D. though the supply from Maine was small, the trade for workers has been very fair. J. D. though the supply from Maine was small, the trade for workers has been very fair. J. D. though the supply form Maine was small, the trade for workers has been very fair. J. D. though the supply fields and the supply form of the supply fields. The supply form the supply fields and

prices do not vary much from week to week. We quote extra \$55 to \$90; ordinary \$25 to \$50 \$60 head. STORE CATTLE. Most of the small cattle and store cows are sold for beef; there is not much call for stores at this season of the year.

SHEEP AND LAMBS.

From the West there were about the same number of sheep and lambs as that of one week ago. Sheared sheep cost from 55 to 65 cts 47 lb. wool sheep from 7 to 8 cts 47 lb; there were but a few of the Western sheep and lambs put on the market for sale, most of them been owned by butchers who employ agents at the West to buy and ship to them. | Nowned | Sem, Nos. 49 & 51 | Beef, Mes. 3P | bbl cash ... 18 00 @20 00 | Beef, family, y bbl... 16 00 @18 70 | pbl... 20 00 @21 00 | Boaton No. 1 | ybbl... 20 00 @21 00 | Boaton No. 20 00 @25 00 | Boaton No. 20 00 | Boa SWINE.

Wholesale. 7 @ 8c # lb; Retail 7 @ 10; Fat Hogs 6 @ 6 cts # lb. NORTHERN CATTLE.

Shipments from the West, by way of Grand Trunk Raiiroad, 465 head, with 171 Northern. There has been a steady demand, and prices are fully sustained. A large portion of the Western Cattle changed hands at the yards. The quality averages as good as last week. In anticipation of the supply from the West, there was quite a delegation of butchers present, who, in most instances, bought some of their stock here. F. B. Sawyer sold 2 Oxen, to dress 500 fbs, at 96; 1 Cow, to dress 500 fbs at 858. R. W. Wilson sold 2 Oxen, at 7c live. Hatthaway & Swift sold 31 Steers, average 1300 fbs, at 7c live; 6 Steers to Mr. Goward, average 1082 fbs, at 66c. S. F. Woodbridge sold 40 Steers to H. Locke, average 1200 fbs, at 64c live; 20 Steers to Mr. Eaton at 7c live; 6 Steers to Mr. Engles, at 7c; 4 at 7c.

Mr. Eaton at 7c live; 6 Steers to Mr. Engles, at 74c; 4 at 74c.

In consideration of a lighter supply of Northern Sheep we expected at least tuil last week's pices, but which were not obtained by 4ch 4b th. Sheared Sheep were among the offerings. The arrivals of Veal Calves, which are in fair demand, and number this week nearly 1100 head, takes of a portion off the Sheep trade. Less Mutton wanted. L. Hastings sold 74 Wool Sheep, average 63 lbs, at 6c; 25 head of sheared Sheep at 5c; these were a pretty hard lot of Sheep. O. E Taylor sold 107 sheep, average 75 lbs, at 7c. DeWplf & Brown sold 91 Sheep, weighed 7920 fbs, at 74c; 36 Sheep at 74c; 36 at 6c; 29 yearlings at 74c; 13 Sheep at 6c.

POULTRY.

DeWolf & Brown sold a lot of Poultry to Mr.
Russell. Prices have not materirily changed from last week, with an improved call. We quote best Chickens 20c 4ff bi; medium grades 184@19c 4ff bi; ordinary Fowl at 18c 4ff lb. quote best Chickens 20c &F ib; medium grades 184@19c &F ib; ordinary Fowl at 18c &F ib.

PHILADELPHIASCATTLE MARKET.

Best Cuttle.—Market dull and prices are steady; about 2100 head soid at 36 10@8 50 \$# 100 fbs for common to cutta. Cows and Calves were dull; sales at \$25 00g 50 \$10 fbs for common to cutta. CONSUMPTION which can be cured by a timely resort to this standard preparation, as has been proved by the hundreds of testimonials received by the proprietors. It is acknowledged by many prominent physicians to be the most reliable preparation ever introduced for the relief and cure of all Lung complaints, and is offered to the public, sanctioned by the experience of over forty years. When resorted to in season it seldom fails to effect a speedy cure in the most severe cases of Coughs, Bronchitis, Croup, Whooping Cough, Influenza, Asthma, Colds, Sore Throat, Pains or Soreness in the Chest and Side, Liver Complaint, Bleeding at the Lungs, &c. Wistar's Balsam does not dry up a Cough, and leave the cause behind, as is the case with most preparations, but it loosens and cleanses the lungs, and allays irritation,

thus removing the cause of the complaint. BETH W. FOWLE & SONS, Boston, Mass. m : 8-52t
